Dana,
Site 18-1-1 has been entered into the database and is ready for download into the EDI system. TM1B, as well as all ground water samples, require Ortho Phosphate reported as P. MNME and TW10 do not require field parameters taken. However, MNME lab analysis shows a pH of 7.89 and a EC of 910 umhos/cm. TW10 lab analysis shows a pH of 7.22 and a EC of 701 umhos/cm. Please refer to Volume 9, Appendix A for all required sampling sites and parameters.

If you have any concerns with the information I have shared, please contact me asap.

Thanks!

Dennis Oakley

Dennis,

I have made the changes from operational to baseline that you requested. I have uploaded all of the information for Cottonwood/Wilberg, Trail Mountain, and Deer Creek from the pipeline into the database. A report is attached.

As a reminder, according to parameters set by the assigned hydrologist, you are still missing a sample for 18-1-1 at Trail Mountain. You are also missing total phosphorous at TM-1b, and pH and Specific

Conductivity at Main N Main E, and TW-10.

Please let me know if you have any questions.

Thank you,

Dana Dean, P.E.

Pam,

The 2nd quarter 2006 water quality data submittal has been completed.
Prior to uploading, please change the following sites from operational
samples to baseline samples:

Deer Creek Mine
RCF1 59-28836
HCC02 59-28852
MFA1 for April and June

Cottonwood
GWR01 for April and May
GWR01 for April, May and June
GWR03 for April and May

When this action is completed, please upload these data into the EDI
master file. If there are any problems or concerns with this
submittal,
please contact me at the numbers below.

Best Regards,

Dennis Oakley
